

Rate & Review Page Type Tutorial

The Rate & Review Page Type is a great way to keep track of the experience the users of your application have.

In order to add a Rate and Review page type you need to access your Application's Dashboard and go to "Edit pages" section. Click on Add New Page button, the "+" button below the list of the currently available pages.

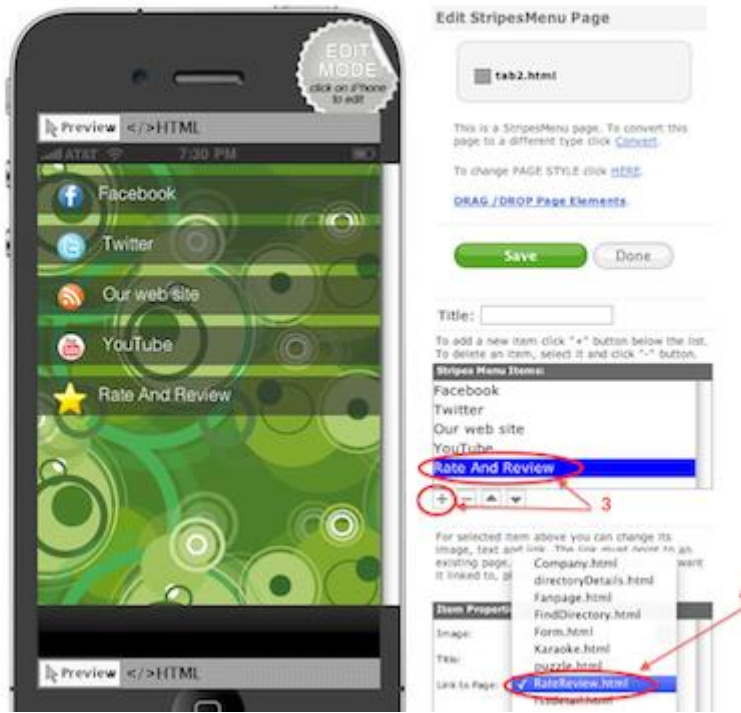

1- Select the Rate & Review Page Type

2- Press Create

After these steps a new Rate & Review page will appear in your application dashboard. As this type of page can't be edited, you only need to link it within the application.

This can be accomplished by adding a Rate & Review Button linked to the Rate & Review Page Type.

3 – Add a new Menu Item in either of the Menu Type pages (in the example was used the Stripes Menu Page Type)

4 - Link the new created Menu item to the proper Rate & Review page that you have added in your application

As a result when opened via the SeattleClouds Previewer Application you will receive the following result :
