# AppShare Page Type Tutorial

AppShare Page Type - a page type used for sharing the application via email or Facebook in order to gain more views/downloads of the application from the App Stores.

In order to add an App Share page type you need to access your Application's Dashboard and go to "Edit pages" section. Click on Add New Page button, the "+" button below the list of the currently available pages.

Once added you may go to Edit the page.

1 - Enter the Application's Name

2 - Select the Application's icon with a max resolution of 100x100pixel

3 – Enter the Application's Description , that will be visible once shared either on Facebook or in the email

4 – Insert the links of the Application from the App Store : Google Play Store for Android App/ Apple App Store for iOS App/ Amazon App Store for Kindle App

5 - Note : You need to have the sync enabled for the AppShare page in the resource manager to be able to add the corresponding links once the application will be live on either of the App Stores.
