Set an App name (the name does not necessary needs to be the same as the one used for the SeattleClouds App). Leave blank the other 2 fields.

## Create New App

App Name: [?]

App Namespace: [?]

Web Hosting: [?]  Yes, I would like free web hosting provided by Heroku ([Learn More](#))

By proceeding, you agree to the [Facebook Platform Policies](#)

After you click "continue", please fill out only the fields marked with red.

### Test

App ID: 167562800079187  
 App Secret: d5d6030b1f5c18bfd4a2c60fc6d1f5c ([reset](#))  
● This app is in Sandbox Mode (Only visible to Admins, Developers and Testers)

#### Basic Info

Display Name: [?]

Namespace: [?]

Contact Email: [?]

App Domains: [?]

Hosting URL: [?] Get one)"/>

Sandbox Mode: [?]  Enabled  Disabled

#### Select how your app integrates with Facebook

Website with Facebook Login Log in to my website using Facebook.

App on Facebook Use my app inside Facebook.com.

Mobile Web Bookmark my web app on Facebook mobile.

Native iOS App

Bundle ID: [?]

\* iPhone App Store ID: [?]

\* iPad App Store ID:

Facebook Login: [?]  Enabled  Disabled

Deep Linking: [?]  Enabled  Disabled

URL Scheme Suffix: [?]

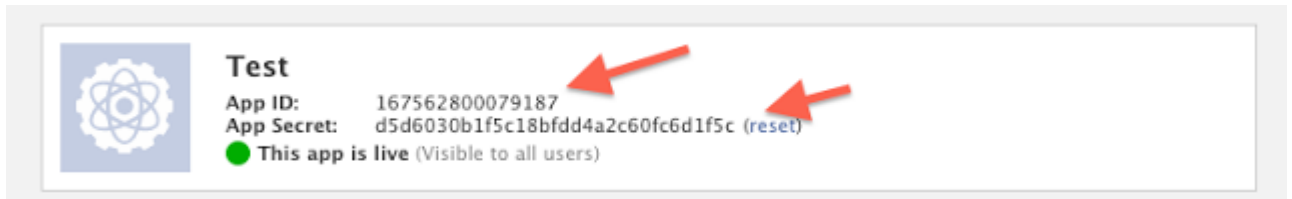

Native Android App Publish from my Android app to Facebook.

Page Tab Build a custom tab for Facebook Pages.

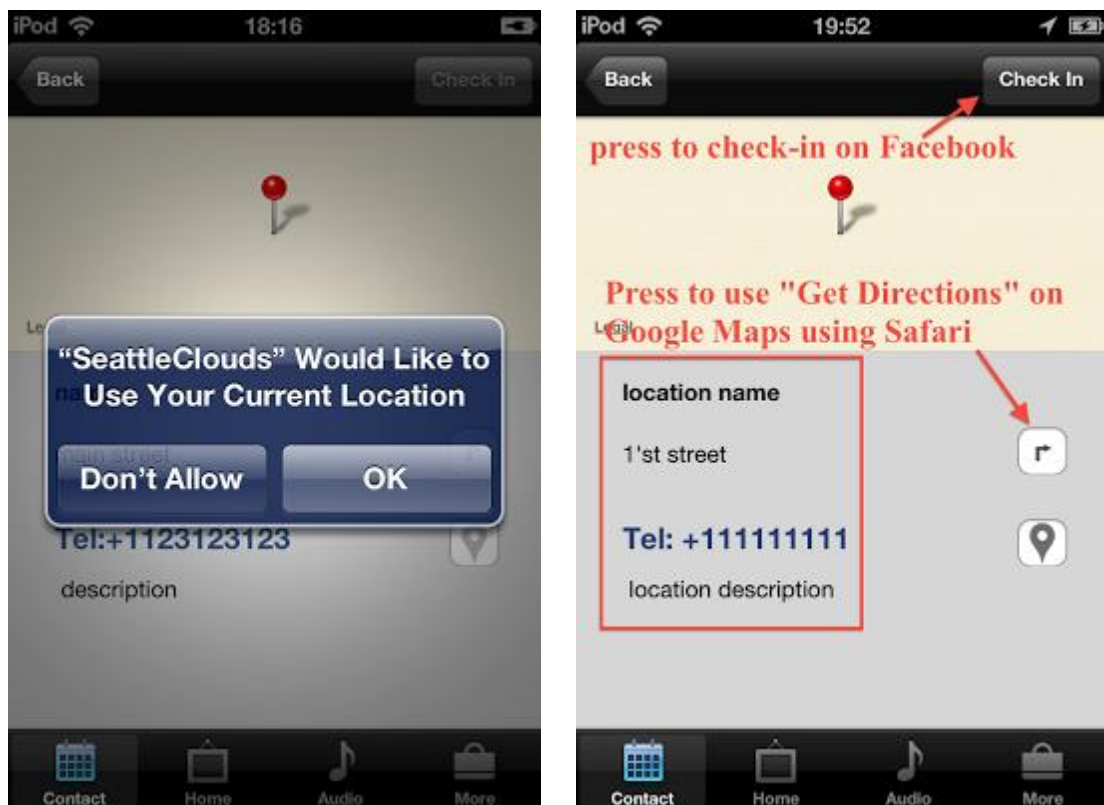

- \* Make sure you disable the sandbox mode.
- \* Bundle ID can be any ID (e.g. com.appname.domain)

\* If the App is not published yet, leave the 'iPhone App Store ID" and "iPad App Store ID" fields blank.

Once you are done, click "save". Set the FB API Key and FB App secret that you see on the top of the page in App Dashboard > App Settings > Facebook.

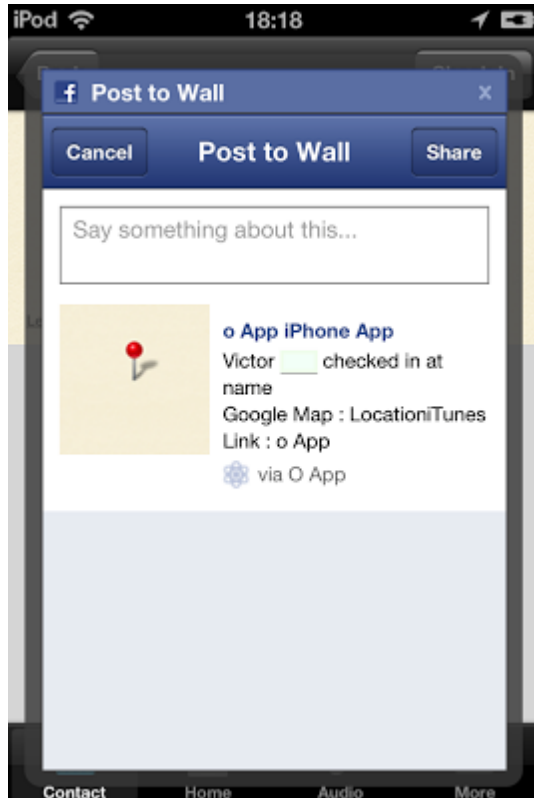

Let's see now how the page looks on the device

Once you press on the "Check-In" button , a popup window will show up. Here you can login with Facebook.

Once you logged in, you may post on Facebook.

On the Facebook website, the shared post will look like this.

**o App iPhone App**  
Victor \_\_\_\_\_ checked in at location name  
Google Map: [Location](#)  
iTunes Link: [o App](#)

[Like](#) · [Comment](#) · [Share](#) · a few seconds ago via [O App](#) · 

- \* Google Map link - will redirect you to the coordinates you have set.
- \* iTunes Link- is the URL link you have set in App Dashboard > App Settings > General > Share link: (application link in App Store)
