

## Large Button Menu Page Type Tutorial

There are a couple of ways to set up a menu page in your app using Appsmoment online editor. One of them is to add a Large Button Menu page to the resources of your app. Its distinctive features are beautifully designed menu tiles with big enough images and easily customizable items:

To add a Large Button Menu page to the resources of your app you can do the following: go to your app's *Dashboard* → *Edit Pages* → + *Add New Page*. In the menu of all our page types select Large Button Menu and click Create.

Large Button Menu editor can be divided in two sections: basic page styling and menu item specific styling.

Basic styling includes font color, background, header and footer images.

To style each item go to the window at the bottom. There you can name each item, select an icon for it from your resource manager and set a target page to which user will be redirected after tapping a tile:

Transition:  Slide  Curl  Flip  None

Item Text Color:  ...

Item Background Image:  ...

Header Image:  ...

Footer Image:  ...

To add a new image click "+" button below the list. To delete an image, select it and click "-" button.
