

Purchase type page

Purchase Page type lets you sell a variety of items directly within your free or paid app, including premium content, virtual goods, and subscriptions using the Apple In-App Purchase or Google Play Store In-App Billing.

How to add and configure this page type:

1. In order to add a new Purchase page to your app access its Dashboard. Go to Edit Pages menu then click the "+" (Add New Page) button.

From the list of the page types available select the Purchase one and click the "NEXT" button.

In the next step you'll need to add a name for this page and click the "Create " button. Once the page is added, you are able to proceed with editing it.

Add new page

New Page Name: .html

2. Configure this page by clicking on the "Edit" button.

3. Configure the Purchase page with your In-App Purchase/In-App Billing product.

Save Done

Product ID from iTunes Connect or Google Play (required):

Non-Consumable **1**

Consumable

Auto-renewable

Free subscription

com.IAP.Auto

Page (or URL) to open if transaction successful (required): **2**

Page ID URL

archive.html **3**

[Read full tutorial](#)

3.1 Choose your In-App Purchase/In-App Billing product type (same as on iTunes/Google Play Store Developers) - **Consumable, Non-Consumable, Auto-renewable or Free subscription.**

Note: Auto-renewable and Free subscriptions types are available ONLY for In-App Purchase (Apple iTunes products)

3.2 ID of the In-App Purchase/In-App Billing product created on iTunes Connect/Google Play Store Developers.

In-App Purchase/In-App Billing ID example:
com.myinappurchase.myappname

3.3 Page (or URL) to open if transaction successful. Choose an app **Page ID** from the drop-down or add your **URL**.

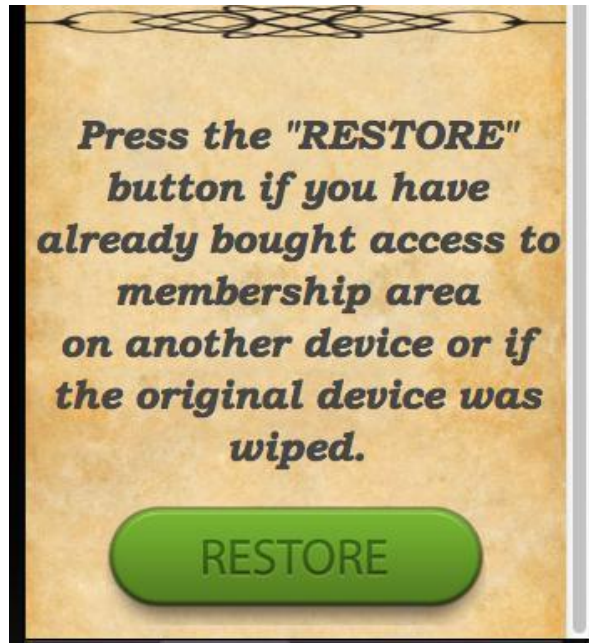

All fields are **REQUIRED**.

4. PRESS SAVE.

*5. If you use a Purchase page type for Apple In-App Purchase you need to add in your app a "Restore Purchase" option by using the restore custom URL scheme.

`Restore your Purchase`

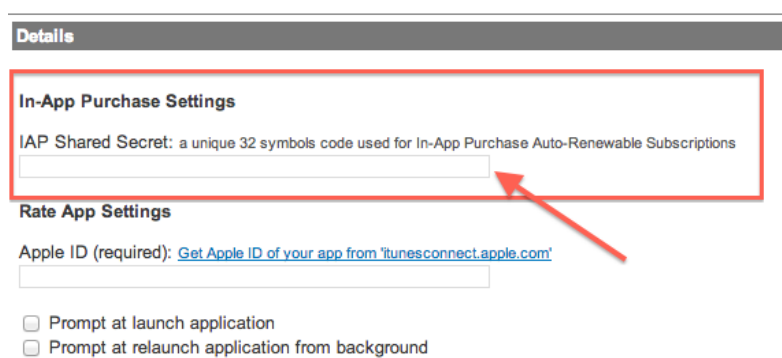

An example how you can use this URL scheme in your app you can find in our [Membership Areas template](#) → tab 2 (Restore)

** You should add only one Restore button per app.

****NOTE:** You can test the Purchase page type ONLY in an Ad-Hoc or App Store/Play Store build using a SandBox account.

*6. For **Auto-renewable** or **Free subscriptions** types you'll need to add the IAP Shared Secret. (Application Settings → Platform Specific Options)

A screenshot of the "Details" page in an app store. The "In-App Purchase Settings" section is highlighted with a red rectangular box. Inside this box, the text "IAP Shared Secret: a unique 32 symbols code used for In-App Purchase Auto-Renewable Subscriptions" is followed by an empty text input field. A red arrow points from the right side of the box towards this input field. Below the "In-App Purchase Settings" section, there is a "Rate App Settings" section with a label "Apple ID (required):" and a link "Get Apple ID of your app from 'itunesconnect.apple.com'", followed by another empty text input field. At the bottom, there are two unchecked checkboxes: "Prompt at launch application" and "Prompt at relaunch application from background".
